APPLICANT'S REQUEST FOR CORRECTED FILING RECEIPT

Sir:

In reviewing the Filing Receipt for the above referenced application, attached hereto as Exhibit A, Applicant notes that an error appears as noted on the copy of the Filing Receipt. Specifically, the second priority information as referenced in the Cross-Reference to Related Applications filed in the original application has been omitted from the Domestic Priority Data on the Official Filing Receipt. A copy of the first page of Applicant's originally filed specification claiming such priority is attached as Exhibit B.

CERTIFICATION OF FACSIMILE TRANSMISSION

I hereby certify that this paper is being facsimile transmitted to the US Patent and Trademark Office of Initial Patent Examination at facsimile number 703 746 9195 on the date shown below.

Date

Appl. No. 10/720,023

Applicant requests that a corrected Filing Receipt be issued to include the full priority data as claimed in Applicants' original specification as follows:

This application claims priority of provisional patent application no. 60/096,105 filed August 10, 1998, and provisional patent application no. 60/096,104 filed August 10, 1998 and provisional patent application no. 60/095,952 filed August 10, 1998, and is a continuation of U.S. Application No. 09/779,329 filed February 8, 2001.

Respectfully submitted,

Gregory T. Gronholm

FILING RECEIPT

OC000000011944447

Date Mailed: 02/20/2004

Receipt is acknowledged of this regular Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Filing Receipt Corrections, facsimile number 703-746-9195. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

Title

Orthotic apparatus and method for using same

Preliminary Class

5

ORTHOTIC APPARATUS AND METHOD FOR USING SAME

Related Applications

10 This application claims priority of provisional patent
application No. 60/096,105 filed August 10, 1998; and provisional
patent application No. 60/096,104 filed August 10, 1998, and
provisional patent application No. 60/095,952 filed August 10, 1998,
and is a continuation of U.S. Application No. 09/779,329 filed
15 February 8, 2001. The present application claims the benefit and
priority of all applications noted above, which are incorporated in
their entirety hereby by reference.

Technical Field

20 This invention relates generally to orthotic devices and more
particularly to orthotic devices designed to promote an increase in
range of motion in a joint by the use of selectively inflatable and
deflatable bladders.

25

Background of the Invention

When a joint is injured either by trauma or by surgery scar
tissue can form which prevents full range of motion of that joint.
Obviously, this is a disadvantageous condition and should be
30 corrected if possible. Often, such correction involves an attempt by
the injured or those assisting the injured to gradually (often over a
period of months) manipulate the joint so that full range of motion is
eventually achieved.

35 Full range of motion of a joint depends upon the anatomy of
that joint and on the particular genetics of each individual. Typically,
joints move in two directions, flexion and extension. Typically,
flexion is to 'bend the joint and extension is to straighten the joint;
however, in the orthopedic convention some joints only flex. For
example, the ankle has dorsiflexion and plantarflexion. Other joints
40 not only flex and extend, they rotate. For example, the elbow joint
has supination and pronation, which is rotation of the hand about the
longitudinal axis of the forearm placing the palm up or the palm
down.
